

## LEVY DETAIL COLUMN TITLE DESCRIPTIONS

---

The Excel tables named **All\_County\_Levy\_Detail\_(year)** contain all the levies from all the counties for taxes due in a particular calendar year. Following is a description of the data contained in each column.

TCCODE: Lists the taxing district code for each taxing district. See the Word file **TaxingDistrictCodes** for a compilation of how the codes are built and their meaning.

DISTRICT NAME: For the most part the names are those used by the county and by local taxing district of the respective county.

LOCALLY ASSESSED VALUE: Locally assessed value of the district as submitted by the respective county. This is the total value of the district and includes both real and personal property values.

LEVY RATE: Tax rate calculated for a specific district levy by the county.

DISTRICT LEVY: Taxes due for the district calculated by dividing the assessed value by 1000 and multiplying by the levy rate for the district.

HIGHEST PRIOR LEVY: Beginning amount by which the highest lawful levy amount subject to the 101% limit (I-747) is calculated.

NEW CONSTRUCTION ASSESSED VALUE: Locally assessed value of new construction and improvements to property within the boundaries of the respective district.

LEVY RATE (PRIOR YEAR): Prior year district levy rate used to calculate the additional taxes that may be levied due to new construction, increases in SAP, annexations, or refunds.

STATE ASSESSED PROPERTY (CURRENT YEAR): The current year value of transportation and utility companies that are centrally assessed per RCW 82.12.270.

STATE ASSESSED PROPERTY (PRIOR YEAR): The prior year value of transportation and utility companies that are centrally assessed per RCW 82.12.270.

ANNEXATION ASSESSED VALUE: The current year locally assessed value of parcels annexed into an existing tax district.

ANNEXATION TAXES DUE: Taxes that may be levied due to the increased value of the district due to annexations (annexation AV / 1000 x the prior year levy rate).

REFUND TAXES DUE: Taxes that may be levied to repay excess taxes paid.

101 MAXIMUM ALLOWABLE LEVY: Total taxes allowed to be levied under the 101% limit. It is usually the highest prior levy times the percent increase (see last item) plus amounts added for new construction, increase in state utility values, annexations and/or refunds. This is one of three caps that may limit a levy; the others are the district statutory maximum rate, and the \$10 of taxes per \$1000 of value limit. The governing body also has the right to budget and levy something less than any of the above. This calculation is only done for those taxing districts with a regular levy.

STATUTORY MAXIMUM RATE: The maximum rate as stated in law that a particular type of district may levy. For cities this rate has been adjusted to reflect any annexations by fire and/or library districts.

LEVY LIMIT PERCENT INCREASE: The percent increase by which a district's base levy is limited. It is currently 1 percent or the IPD, whichever is less, unless an increase is voter approved. The new levy limit may be increased by new construction in the district, the increase in state assessed property value, annexations, or refunds.

# TAXING DISTRICT LEVY REPORT CODES

## (TDCODES)

County Bytes 1, 2		Taxing District Bytes 3, 4		ID/Budget Item Bytes 5, 6, 7	Levy Type Byte 8	Add'l Byte 9

### Examples:

1) 060300541 is read as such: 06 is Clark County, 03 indicates a city, 005 is the city of Vancouver (its 4 digit location code for sales tax purposes is 0605), byte eight with the number 4 indicates a non-school local bond, the 1 in byte 9 just distinguishes items if the taxing district has more than one bond or levy or some other item in byte 8.

2) 240435010 is read as Okanogan County school district #350 (The Methow Valley School District) Maintenance & Operations (M&O) levy.

3) 310702600 is read as Snohomish County fire district #26.
